Household Valuables Inventory

Item	Make	Model	Serial Number	Color

This form can be important in identifying your valuables if you are a victim of a breaking and entering. Walk through the house and write down the serial numbers especially on big ticket items like their electronics, weapons, cameras, etc. In many cases police can not find the owner of stolen property once the item was recovered. There are hundreds of unclaimed items that are put into evidence including computer screens and televisions.

Most of the items have serial numbers, but there was no way to connect them to victims.

Pawn shops are required by law to send police a list of nearly everything they receive. The list includes serial and model numbers. Pawn shops are also required to take proof of identification when they receive something.

Don’t Be a Victim!!!
