

CITY OF SHELBY - ENVIRONMENTAL POLICY

The City of Shelby is committed to providing reliable, high quality, and cost effective services to the people and the communities we serve. We strive to optimize our operations and services. In fulfillment of this commitment it is the City of Shelby's policy to:

Protect the environment and prevent pollution by avoiding or reducing environmental pollution produced directly from operations or indirectly by the consumption of resources.

Continually improve our performance relevant to this environmental policy. We shall identify, monitor, and evaluate the environmental impacts of our operations and services and set measurable goals to reduce those impacts on the environment.

Comply with all legal requirements and environmental commitments that we agree to as compliance obligations. We shall maintain thorough and accurate measurement and reporting of our environmental compliance.

Ensure communication and education of our Environmental Management System among and between our staff, customers, vendors, contractors, and governing agencies.
