

Explore the Many Benefits Natural Gas Has to Offer

Comfortable

On the coldest winter days you can count on natural gas to keep your home warm and cozy. Natural gas provides heat that is 25-35 degrees warmer than electric, oil or other heating sources. You'll love the comfort natural gas will give you all winter long.

Economical

It's your money, don't throw it away! Natural gas continues to be one of the most affordable ways to heat your home, and can provide significant savings on your energy costs.

Convenient

Professional chefs prefer cooking on a gas stove, and it's easy to see why. The heat produced from a gas stove cooks food faster and more evenly than electric. You'll appreciate the time saved in the kitchen, and the energy savings too!

Drying your clothes can be costly. As a matter of fact, your clothes dryer is the third highest energy consuming appliance in your home. High-efficiency natural gas dryers dry your clothes more quickly and for less money than electric models. A natural gas dryer is less expensive to operate than an electric dryer, and that translates into BIG savings for you!

Reliable

Losing power during a storm is never convenient, but you can be prepared for the unexpected with natural gas from the City of Shelby. With a natural gas water heater you can still take a hot shower or bath.

With a natural gas range and gas logs you can even cook and stay nice and warm during a power outage. Natural gas offers peace of mind and is always there providing reliable service to you and your family.

Efficient

Natural gas offers many benefits that are important to homeowners, and it is also more efficient than ever. That means natural gas is not only more economical, comfortable, convenient and reliable than other forms of energy, but it provides these benefits to you more responsibly as well.

Safe

Natural gas is regulated by the Federal Energy Regulatory Commission to ensure the safety of natural gas and compliance with federal laws. Every distributor of natural gas undergoes stringent audits and annual reviews of its natural gas operating system. All for the purpose of providing a safe source of energy to you. You can sleep peaceful at night knowing that our natural gas service is safely there working for you.
